PROFESSIONAL SUMMARY

Data Analyst with **8 months of internship experience** applying **Python, SQL, Power BI, Excel, and Pandas** to data cleaning, EDA, ETL pipelines, and business reporting across **6+ projects**. Skilled in RFM analysis, customer segmentation, time series analysis, and data visualization. Delivered **Generative AI** and **OpenAI API** applications via **Streamlit**, reducing manual analysis effort by up to **35%** and enabling data-driven decisions for business stakeholders.

TECHNICAL SKILLS

Programming Languages:	Python, SQL
Data Analysis:	Exploratory Data Analysis (EDA), Data Wrangling, Data Cleaning, Data Modeling, RFM Analysis, Statistical Analysis, Feature Engineering, Time Series Analysis, ETL Pipelines
BI & Visualization:	Power BI (DAX, Power Query), Excel (Pivot Tables, VLOOKUP, XLOOKUP), Matplotlib, Seaborn
Databases:	MySQL, PostgreSQL
Analytics & AI:	Business Intelligence (BI), Dashboard Development, KPI Reporting, Predictive Analytics, Generative AI, OpenAI API, Prompt Engineering
Tools & Platforms:	Pandas, NumPy, Streamlit, Git, GitHub, Jupyter Notebook, VS Code, Folium

EXPERIENCE

Data Analyst Intern <i>TechSimPlus Learnings, Bhopal (M.P.)</i>	Sep 2025 – Apr 2026
- Leveraged Python, SQL, Excel, and Power BI to clean, model, and analyse 50K+ records across 4+ projects in sales, customer behaviour, and product analytics - Transformed raw transactional data into 2 executive Power BI dashboards (Blinkit Sales, Coca-Cola Analysis) using DAX and Power Query, saving 5+ hours of manual reporting per week - Automated ETL pipelines covering data wrangling, EDA, and visualization with Pandas, NumPy, and Seaborn, cutting reporting turnaround by 30% across all deliverables - Executed RFM customer segmentation on 10K+ records, isolating 5 high-value cohorts to inform targeted marketing campaigns and retention strategy	

PROJECTS

AI Career Assistant Python, Streamlit, OpenAI API GitHub — Live Demo	2026
- Integrated OpenAI API with Streamlit to ship a Generative AI web app delivering resume critique, mock interview simulations, and career roadmaps to 500+ users - Architected a prompt engineering framework with session-based memory, reducing average AI response irrelevance by 40% through context-aware multi-turn conversation logic - Deployed on Streamlit Cloud via Git-based CI/CD, achieving 100% uptime and unrestricted public access with zero infrastructure cost	
Customer Segmentation Analysis Python, Pandas, NumPy, Matplotlib, Seaborn	2026
- Constructed a complete RFM (Recency, Frequency, Monetary) Analysis pipeline on 500K+ retail transactions, classifying customers into 6 distinct segments for precision targeting - Processed datasets via feature engineering and data cleaning — resolving 15% nulls, encoding 8 categorical fields — reducing data errors by 92% - Visualised time series trends and segment distributions via Matplotlib and Seaborn, producing a 12-page stakeholder report with actionable customer analytics recommendations	
Digital Payment Transaction Analytics Dashboard Power BI, DAX, Power Query, SQL	2025
- Delivered an end-to-end Power BI dashboard mapping 300K+ transactions across 100K+ users, surfacing KPIs including 3.47Bn transaction value and 96% success rate - Optimized ETL pipelines in Power Query for schema normalisation and data cleaning; formulated 20+ DAX measures for Month-over-Month growth, cutting dashboard load time by 40% - Modelled 3 relational schemas linking transaction, customer, and date tables, enabling drill-through reporting that reduced ad-hoc query time by 50% for stakeholders	
Dubai Cold Coffee Finder Python, Streamlit, Folium, Pandas Live Demo	2026
- Produced a geospatial web app indexing 500+ locations with real-time multi-parameter filtering (rating, price, distance) via Folium and Streamlit, serving users across 3 map layers - Cleansed and validated location datasets using Pandas — deduplication, coordinate checks, null imputation — achieving 98% data accuracy across all 500+ indexed entries	
Sales Performance Analytics Dashboard Power BI, DAX, SQL	2024
- Analyzed 10K+ transaction records using Power BI and SQL to surface regional revenue trends, operational KPIs, and financial metrics for 3 cross-functional teams - Streamlined reporting automation with Power Query, cutting manual effort by 35% and enabling near real-time refresh for 8+ non-technical business users - Generated 15+ DAX measures for revenue growth, customer LTV, and performance benchmarks, improving forecast accuracy by 20% through predictive analytics	

EDUCATION

Bachelor of Technology – Computer Science (Artificial Intelligence & Data Science) LNCT Group of Colleges, RGPV University	Jul 2022 – May 2026 CGPA: 6.4/10
Higher Secondary Certificate (PCM – Physics, Chemistry, Mathematics) M. V. College, Nalanda, Bihar	Apr 2020 – Mar 2022 67.4%

CERTIFICATIONS

- Google Data Analytics Professional Certificate | Coursera | 2024
- Master in Data Analysis & Analytics | Udemy | 2026
- SQL for Data Analysis | Udemy | 2025
- Internship Completion Certificate | TechSimPlus Learnings | 2026
